Preface

After over 40 years of translation work to create **Grammar Uses Version** (GUV), a decision was made to update this version and produce **Grammar Bible Version** (GBV). GUV was developed by examining the original Greek structure more precisely and avoiding unnecessary dynamic equivalence. It is also based upon the Majority Text (BYZ) with differences from the Textus Receptus (TR) noted in the variant readings.

The original motivation behind GUV was the lack of translations that consistently rendered the present tense as linear and the imperfect tense as ongoing rather than a simple past. This distinction preserves the aorist as a simple past event while maintaining the imperfect as continuous action in the past, accurately reflecting its intended sense.

In GUV, subjunctives followed the Old English expressions of wish, such as "may," "might," and "should." The aorist subjunctive conveys a sense of potentiality—something that could happen rather than something definite. GBV modernized this by introducing the present indicative, aligning more closely with contemporary English while preserving the non-linear nature of the aorist subjunctive. This revision retains Greek grammatical structures, including participles and subjunctives, while refining the English to be smoother and more precise. The goal is to maintain the integrity of the Greek while enhancing readability and clarity.

If you find any errors, please report them to:
christianclassicsreproductions@gmail.com

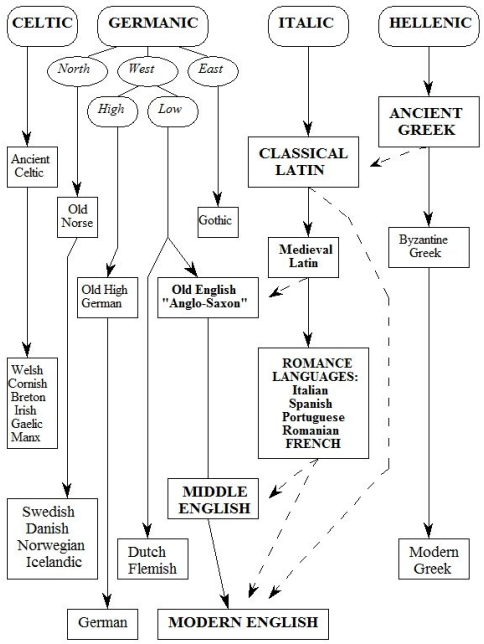
Key Adjustments from GUV:

- Smoothed sentence structure for clarity.
- Rendered aorist participles with aorist main verbs as pluperfect.
- Rendered present participles with aorist main verbs as imperfect.
- Rendered perfect passive indicatives as present tense non-linear using the code [b].
- Retained present indicative non-linear for aorist subjunctives and linear for present tense subjunctives, using the code [sp].
- In some cases, the infinitive is used to modernize the subjunctive in English, which is indicated by the code [si].
- Kept present tense indicative verbs linear – this means the present tense is continuous.
- Maintained historical present tense where appropriate by using the code *.
- Ensured consistent tense usage, avoiding unnecessary shifts. Where shifts occur, the codes < or > are used.
- Improved sentence flow while preserving structure.
- Removed redundant conjunctions.
- Ensured alignment with Koine Greek grammar.
- Enhanced readability while maintaining grammatical integrity.

This revision refines the wording for smoothness while preserving the original tense distinctions and faithfully adhering to Greek structure.

Introduction

The New Testament was written in “Koine” Greek, meaning it was the Greek language of the spoken people. Latin was used for business at that time, and Hebrew was the language of the Jews. This grammar is a simplified version, designed to benefit all readers.



Koine is simply the Greek word for "common." Many may recognize it from the related word *koinonia*, meaning "fellowship"—a concept rooted in shared experience or mutual participation. Fellowship, at its core, means having something in common.

From the illustration above, we see that Koine Greek eventually developed into Byzantine Greek. Meanwhile, the English used during the time of the King James Version was shaped by both Low German and Medieval Latin—languages that had themselves been influenced by Classical Greek and Classical Latin. It is no surprise, then, that the progressive present and imperfect tenses were largely obscured in translation. Even today, Latin, French, and German lack a distinct linear present tense, which further contributed to this loss of verbal nuance.

Koine Greek was the common language spoken across much of the Mediterranean world in the first century. As Alexander the Great expanded his empire, he spread not only Greek culture but also the Greek language. Much like English functions as a global lingua franca today, Greek became the dominant international language of its time. Because Koine was widely understood, it was uniquely positioned for spreading the gospel throughout the known world.

Koine Greek was common not only in geographic spread but also in social function. It was not the polished, elite language of scholars and philosophers—that was Classical Greek. Rather, Koine was the everyday language of labourers, merchants, soldiers, and housewives. It was conversational, practical, and unpretentious—the vernacular of the people. The great literary works of antiquity were written in Classical Greek. Koine, by contrast, drew little

scholarly interest—except for one reason: it is the language of the New Testament. God chose the common language of the time to make His Word accessible to all.

Unfortunately, many English translations have misrepresented this reality by treating the New Testament as if it were written in Classical Greek. This misunderstanding often leads translators to interpret Greek verbs as though they function like those in Latin, German, or French—languages without a distinct progressive present tense. In such systems, the present tense tends to imply general or habitual action, rather than ongoing activity.

This mistaken assumption can obscure an important feature of Koine Greek: its emphasis on aspect—how an action unfolds over time. Koine Greek is especially rich in aspectual nuance, and the present and imperfect tenses typically express continuous or linear action. Because Koine is a spoken, not literary, language, it relies more heavily on verbal aspect to express time and texture.

Modern English, by contrast, distinguishes between simple and progressive present tenses. For example, “He runs” (simple) versus “He is running” (progressive). Koine Greek expresses that kind of nuance not through a separate tense but through aspect. The present tense in Koine corresponds more closely to the English progressive form, especially when indicating action in progress.

Consider a few key examples:

- The **aorist subjunctive**, used in purpose or conditional clauses, is typically rendered in English with the simple present, as in: “If he run,” rather than “If he is running.” Though English uses a simple form, the Greek subjunctive marks the event as non-linear and undefined in time.
- The **perfect passive**, such as *τετέλεσται* ("It is finished"), represents a completed action with continuing results. English often renders this in the simple present to reflect the ongoing state.
- The verb **οἶδα** ("I have known") is a perfect form used idiomatically in Koine to mean “I know,” and thus appears as a present-tense verb in English translation. Although perfect in form, its usage conveys present knowledge, not past experience.

These examples demonstrate that Koine Greek expresses verbal ideas not just by tense but through aspect. Misunderstanding its informal, conversational structure leads to oversimplified or inaccurate English renderings. Translators who recognize the difference between Classical and Koine Greek—and the real-life,

practical nature of the latter—are better equipped to convey the intended meaning of the New Testament.

Understanding Koine Greek as the living, accessible language of the first-century world helps us better appreciate not only the grammar but also the intent behind Scripture. God chose this form of Greek—not refined or elite, but common and clear—to communicate His truth to everyone.

Let us begin with simple sentences. A simple sentence typically starts with a subject, followed by a verb, and then a direct object. For example: "John hit the ball," or "The ball hit John." Notice the difference when the subject and the direct object are reversed.

Next, we add an indirect object. For example: "John hit the ball to Peter." Here, the indirect object is introduced with "to," similar to how it functions in Greek grammar. We provided codes to show that words like "to," "of," "in," etc., are part of the Greek word due to its case. Typically, the genitive case takes "of," while the dative case takes "to." However, there are other words that can define a word's case. We use the code [i] to indicate that these words are part of the noun's case rather than a separate Greek preposition. This distinction is important because Greek prepositions can have similar forms to these case markers. By using [i], we clarify when such words are inherent to the noun's grammatical case, not independent prepositions.

So far, we have explained the nominative case (the "subject"), the accusative case (the "direct object"), and the dative case (the "indirect object"). Finally, there is the genitive case, which is typically possessive. For example: "John hit his ball to Peter." The word "his" indicates that the ball belongs to John.

Our parsing and explanations are designed to enhance your understanding! English has evolved from Old English to Modern English, where the perfect tense is increasingly used to express present tense in a non-linear way but with enduring results, as seen in expressions like "it is finished" and "it is written." The pluperfect periphrastic has also shifted over time, changing from "had been revealed" to "was revealed." Similarly, the subjunctive mood is evolving to align more closely with a present tense, non-linear usage. We have embraced these changes and incorporated codes to help readers understand why certain forms differ from their original structures.

Why Are We Still Stuck with Archaic Anglo-Saxon Bible Translations?

In Modern English, we have twelve verb tenses that allow for precise distinctions in time and aspect. Yet most Bible translations—especially in

English—still rely on only five: pluperfect, perfect, past, present, and future. Because of this, we miss out on essential features of the original Greek—especially the continuous present tense and the imperfect tense, both of which Koine Greek expresses clearly.

This problem is rooted in **tradition**, not in **grammar**, and it affects not only English but also other modern languages like French, which often follow English translation patterns instead of representing the Greek faithfully.

Why We're Still Trapped in This Outdated Model

1. Historical Inertia

Early English Bible translations—especially the King James Version (1611)—set the precedent for how the Bible should sound in English. But Early Modern English lacked the verbal distinctions we now have. At the time:

- "I go" could mean both "I go regularly" and "I am going."
- "I went" and "I was going" often blurred together in usage.

Naturally, translators defaulted to simple forms: present, past, future, perfect, and pluperfect—because their language didn't yet express aspect as clearly as ours does today.

2. Theological Conservatism

Many religious traditions resist altering the wording of Scripture, fearing it might be seen as tampering with sacred text. But preserving outdated grammar for the sake of tradition comes at the cost of fidelity to the original. Ironically, more precise modern tenses would bring us **closer** to the Greek—not further from it.

3. Misrepresentation of Koine Greek Verbal Aspect

Koine Greek makes fine distinctions that most English Bibles ignore:

- **Imperfect**: ongoing past action ("he was healing")
- **Aorist**: simple, punctiliar past ("he healed")
- **Present**: ongoing, continuous action ("he is healing" or "he happens to be healing")
- **Perfect**: completed action with present relevance ("he has healed and remains healed")

But most English translations collapse these into:

- Imperfect and aorist = simple past
- Present = simple present

- Perfect = past or awkward pseudo-perfect

This flattens the Greek and erases important narrative dynamics. The difference between "he was healing" and "he healed" matters—especially in Gospel narratives.

4. Modern English Has the Right Tools—But They're Ignored

Contemporary English can now handle these distinctions:

- **Present progressive** ("is walking")
- **Past progressive** ("was walking")
- **Present perfect** ("has walked")
- **Future perfect** ("will have walked")

These forms are capable of mirroring Greek tense and aspect far more faithfully. Yet translators continue to rely on simple forms, ignoring the richness that modern grammar offers.

5. Influence on Other Languages

This problem extends beyond English. French translations—particularly Protestant ones—often imitate English rather than follow their own grammar or the Greek text. For instance:

- Greek **imperfect** is often rendered as **passé composé** or **passé simple**, even though **imparfait** would be more accurate.
- This is not a failure of French grammar but a consequence of copying English translation tradition too closely.

What Needs to Change

1. **Use the continuous present in English** for the Greek present tense.
   – Greek: *ἐδιδάσκεν* → "he *was* teaching" (not "he taught")
2. **Use the French imparfait** when the Greek is imperfect.
   – Greek: *ἠγάπα* → "il *aimait*" (not "il a aimé")
3. **Let aspect, not tradition, guide tense selection.**
   Koine Greek isn't vague—it's precise. Our translations should reflect that.
4. **Educate readers and translators.**
   Many don't realize what's being lost in traditional renderings .

Final Thought

Modern readers are being shortchanged by translations that don't honor the verbal texture of the Greek. The New Testament was not written in flat, static tenses—it breathes with movement, repetition, and vivid shifts in time and aspect. Updating our translations to reflect that—using the full range of modern English (and French) grammar—would not only improve accuracy but **restore the vibrancy** of the original text.

Parts of Speech

Just like in English, Koine Greek has categories into which words are classified according to their function in sentences. We will place each division from the most important to the least:

Verb: word of action

Noun: person, place or thing

Pronoun: generic version of nouns as they identify people and things

Adjective: describe the nouns and pronouns

Adverb: describe the verb, the adjective and even other adverbs

Article: function like adjective which modify nouns and verbs

Conjunction: joins words, phrases, and sentences

Interjection: word that stands alone to convey emotion

Preposition: word that joins nouns as a clause

Particle: lacking grammar function

Verb

Since we have strong numbers, there is no need to learn vocabulary, verb construction, or even parsing, because it is all done for us. We can use Greek if we know how to use these tools.

Example:

μετρηθησεται <3354> (5701) *{v-FPI-3S}:*

3354 μετρέω metreo *met-reh'-o*

from **3358**; v; TDNT-4:632,590; *{See TDNT 488}*

AV-measure 7, mete 3; 10

1) to measure, to measure out or off
  1a) any space or distance with a measurer's reed or rule

1b) metaph. to judge according to any rule or standard, to estimate
2) to measure out, mete out to, i.e. to give by measure

5701: TVM: Future **5776**, Passive **5786**, Indicative **5791**, Count: 251
Verb-Future Passive Indicative- 3rd personal singular

Moods

Indicative: statement or question

Imperative: command

Subjunctive: purpose or possibility

Optative: strongest possibility of an event

Participle: verbal adjective

Infinitive: verbal noun

Indicatives:

Below is our modern **English verb tenses**.

In **Koine Greek**, it uses continuous for Present and Imperfect tenses, while using simple for past (AORIST) and future tense. The perfect tense is present perfect in Greek and the past perfect is the pluperfect in Greek. Many modern translations have gone to the simple present tense, but the Greek has more linear approach to the present tense.

Indicatives	**Aspect**	**Active**	**Middle**	**Passive**
Continuous Present Tense* **	Progressive/Repeated	I am writing	He is writing for himself	It is being written
Simple Present Tense (perfect tenses)	Habitual or Gnomic certain English verbs do not allow progressive forms. These include: *have* (in the sense of possession), *know*, *like*, *love*, *hate*, *want*, *need*, *desire*, *wish*, *appreciate*, and *prefer*	"knows[b]" *οἶδα* **"stands[b]" (ἕστηκα)**	He desires for himself	It is finished[b] It is written[b]
Historical Present	Context	I wrote*	I wrote for myself*	It was written*
Imperfect Tense	Ongoing past	I was running	He was running for himself	It was being run
Future Tense	Expected event	I shall jump	He will jump for himself	It will be run
Aorist Tense	Punctiliar	I threw	He threw for himself	It was thrown
Perfect Tense	Past completed with present result	I have lost	He has lost for	It has been

			himself	lost
Pluperfect Tense	Action before another past event	I had finished	He had finished for himself	It had been finished

******* While most present tense forms will default to continuous (linear) present, they may also be understood as simple present or historical present depending on context. Since our translation defaults to linear, please rely on context to confirm the intended sense.

<u>Modern Greek Grammars Supporting Present Tense as Linear</u>

1. **Daniel B. Wallace**

Title: *Greek Grammar Beyond the Basics: An Exegetical Syntax of the New Testament* (1996)

- **Quote**:

"The present tense in Greek is used to describe an action that is in progress or a state that continues. It is sometimes called the progressive or continuous tense." (p. 518)

- He distinguishes between the **aspectual value (imperfective)** and **Aktionsart (actual nature of the action)**, but still affirms that the present tense by default presents an action as **unfolding or ongoing**.
- He lists specialized categories like **historical present**, **futuristic present**, and **gnomic present** precisely because these are exceptions to the **linear default**.

2. **Buist Fanning**

Title: *Verbal Aspect in New Testament Greek* (1990)

- **Quote**:

"The present tense-form is characteristically used to portray action as **in progress or as a state in view**, without reference to the beginning or end." (p. 217)

- He classifies this as **imperfective aspect**.
- **Gnomic uses** (e.g., "The one who believes") are discussed as general truths, but not as denying the **aspectual force** of the tense.

Present = Continuous, Progressive, Durative

- As summarized by standard grammars:

  "The present, representing continuous action" (Dana & Mantey)

"The present tense is basically linear or durative, ongoing in its kind of action… known as the progressive present." (Hewett)

- Mounce echoes Turner and these grammars:

  "The [present active indicative] can be either a continuous ('I am studying') or undefined ('I study') action. We recommend using a continuous translation by default…"

- Ezra Project similarly defines:

  "The Greek present tense indicates continued action, something that happens continually or repeatedly, or something that is in the process of happening."

These descriptions all align with Turner's core: **present = ongoing/process**, unless context suggests otherwise.

Examples from Text (Progressive Present)

- Frequent occurrences like **Mark 2:5**:

  τέκνον, ἀφίενταί σου αἱ ἁμαρτίαι — "Child, your sins *are being forgiven*."
  Here, *ἀφίενταί* (present tense) signals **ongoing forgiveness**, not a past, completed action.

This aligns perfectly with Turner's insistence that the default translation of the present should be **continuous or progressive**.

Contextual Nuances: Historical & Perfect-like Phrases

- Turner notes the **"historical (dramatic) present"** where a present tense narrates past events for vivid effect—an acknowledged secondary use.
- Sometimes a present expresses a **perfect or extended sense**, such as:
  - **2 Tim 3:15** – present *οἶδας* ("you know") covers the period "from childhood."
  - **2 Pet 3:4**, **1 John 3:8** – present forms indicate a **state continuing into the present**, much like a perfect.

These cases are exceptions to the general rule—they reflect contextually grounded extensions of aspect.

✍ **Summary Table**

Aspectual Use	Stem/Tense	Translation Guide
Progressive/Durative	Present Indicative	"I am doing," "is happening"—ongoing/habitual action (default)

Punctiliar (Aorist)	Aorist Indicative	"I did"—single, complete event
Perfect/Extended Present	Present	Ongoing result-state ("has known," "continues to…")
Historical Present	Present	Narrating past events for vivid immediacy

☑ **Bottom Line**

Nigel Turner, following Moulton & Howard, defines the Greek present stem as **primarily progressive or durative aspect**: an ongoing or habitual action. Exceptions—such as perfect-like extensions or vivid historical usage—are recognized but marked as **context-driven**, not the norm.

3. **Stanley E. Porter**

Title: *Verbal Aspect in the Greek New Testament* (1989)

- **Quote**:

"The present tense indicates **imperfective aspect**, that is, the internal, unfolding nature of the action or state." (p. 89)

- He emphasizes that aspect is **inherent to the tense-form**, not supplied by context.

4. **Rodney J. Decker**

Title: *Temporal Deixis of the Greek Verb in the Gospel of Mark* (2001)

- **Quote**:

"The present tense-form typically presents an action as **in progress or as a continuing state**... its imperfective aspect is default unless overridden by context." (p. 27)

5. **Con Campbell**

Title: *Basics of Verbal Aspect in Biblical Greek* (2008); *Advances in the Study of Greek* (2015)

- **Quote (Basics)**:

"Present-tense forms carry imperfective aspect... The action is viewed from the inside, as in process or ongoing." (p. 20)

- **Quote (Advances)**:

"It is false to say the present tense cannot indicate linearity—**it normally does** unless overridden contextually." (pp. 114–117)

6. **Richard A. Young**

Title: *Intermediate New Testament Greek: A Linguistic and Exegetical Approach* (1994)

- **Quote**:

"The present tense is **typically used to portray action as in progress**. It is called the imperfective or progressive aspect." (p. 107)

7. A. T. Robertson

Work: *A Grammar of the Greek New Testament in the Light of Historical Research* (1914)

- **Quote**:

  "The present tense is the durative tense. It represents linear action." (p. 879)

- Robertson was an early proponent of **continuous aspect** before the full rise of verbal aspect theory. He understood the present tense as naturally expressing action in progress unless idiomatically altered (e.g., historical present).

1. Primary Function: Durative/Linear

Robertson states that the present stem typically "denotes action in progress,"—that is, **linear or progressive aspect**, not merely time-based.

2. Contextual Exceptions: Punctiliar Use

He cautions that while its dominant meaning is durative, **the present can sometimes signify punctiliar or simple events**, depending on the verb and context.

"It has already been seen that the durative sense does not monopolize the 'present' tense, though it more frequently denotes linear action. The verb and the context must decide." (p. 879)

3. Iterative Present

Robertson identifies an **iterative present**, where repeated or habitual actions are depicted (e.g. "he keeps doing X"), often shown as a series of dots rather than a continuous line in his diagrams.

4. Punctiliar Present: "Aoristic"

He acknowledges the so-called "aoristic present": uses of the present that express **single, undefined actions**, due to Greek lacking a specific present-aorist differentiation in certain moods .

5. Aspect over Temporal Meaning

Robertson urges understanding Greek primarily in terms of **Aktionsart (aspect)**, not just tense or time relations. He warns against forcing Greek tenses into Latin or English temporal molds

☑ Summary Table: Robertson's View

Usage	Description
Durative / Progressive	Present stem shows ongoing/in-progress action (default)
Iterative	Repeated or habitual action ("keeps doing X")
Punctiliar ("Aoristic Present")	Single, undefined event due to context or specific verbs
Gnomic/Historical/Futuristic	Varying nuanced uses such as proverbial or dramatic narration (addressed by Robertson too)

📋 In Brief

Robertson, like Turner, underscores that the **present stem is fundamentally durative/progressive**, yet he acknowledges it can carry **punctiliar**, **iterative**, or **gnomic** readings based on **verb-specific and contextual cues**. He champions analyzing Greek tenses by **aspectual nuance** rather than fitting them into strict temporal categories typical of Latin or English.

8. James Hope Moulton

Work: *Prolegomena, Vol. I of Moulton-Howard-Turner, A Grammar of New Testament Greek* (1906)

- **Quote**:

  "The present tense is usually durative: it denotes action going on continuously." (p. 111)

- Moulton's grammar laid foundational work for later aspect studies. He consistently described the present tense as durative or continuous.

9. Nigel Turner

Work: *Syntax*, Vol. III of Moulton-Howard-Turner, *A Grammar of New Testament Greek* (1963)

- **Quote**:

  "In articular participles like *ho pisteuōn*, the action (time or variety) is irrelevant and the participle becomes a proper name. Yet, the form remains present and typically describes an **ongoing state**." (pp. 150–151)

- Turner acknowledges the **gnomic and nominalizing uses**, but does **not reject** the continuous force of the present.

Nigel Turner, in *A Grammar of New Testament Greek* (vol. III, *Syntax*, 1963), emphasizes that the present stem in Koine Greek expresses aspect—specifically **linear (durative) action**—rather than strictly time. He defines two fundamental Aktionsarten:

1. **Continuous or linear** (represented by the **present tense stem**),
2. **Instantaneous or punctiliar** (represented by the **aorist tense stem**).

Thus, when Turner describes the **present tense**, he treats it primarily as **progressive or ongoing action**, rather than a single, completed event. In his words, "tense-stems indicate the point of view from which the action . . . is regarded" (p. 59), making the present tense a way to view an action as current and **continuing**, not necessarily as an event with its endpoint already reached.

Despite this general portrayal, Turner does acknowledge that the present stem can sometimes function in a **punctiliar** sense—e.g., the **'historical (dramatic) present'**, where a present stem describes a past event for vivid effect . But his **default understanding** remains that the present tense is **primarily durative**, capturing an action in progress or a habitual state.

🔍 **Summary of Turner on the Greek Present Tense**

Aspect	Representation	Turner's View
Durative / Linear	Present stem	Primary usage—ongoing, continuous actions or habitual situations
Punctiliar	Aorist stem (mainly)	Instantaneous events—unless present is used diagnostically (e.g., for vividness)
Historical Present	Present stem for past action	Recognizes this dramatic usage, though atypical to the core aspectual role

So, when Turner (following classical Greek grammars) treats the present in **indicative mood**, he's referring to a **progressive, linear** or **continuative** action—something unfolding in real time or habitually—while fully aware that context may shift it toward punctiliar uses.

10. Friedrich Blass & Albert Debrunner

Work: *A Greek Grammar of the New Testament and Other Early Christian Literature* (BDF)

- **Quote**:

  "The present tense denotes action in progress (durative, linear)." (BDF §318)

- BDF is one of the most respected and widely used technical Greek grammars, particularly in German and English-speaking academia.

11. J.H. Moulton & W.F. Howard

Work: *Accidence and Syntax of New Testament Greek*

- **Quote**:

  "The present indicative usually denotes **linear** or continuous action."

- Moulton and Howard's view was consistent with the traditional understanding and later linguistic refinements.

12. Moises Silva

Work: *God, Language and Scripture: Reading the Bible in the Light of General Linguistics*

- **Summary**: Silva affirms that **the present tense normally conveys imperfective aspect**, and while it may take on other meanings depending on context, linearity is the **default interpretation**.

13. John A. L. Lee

Work: *A History of New Testament Lexicography* (2003)

- **Summary**: While more focused on lexicography, Lee supports aspect-based interpretations and acknowledges the **ongoing nature** of present-tense forms in their unmarked usage.

Continuous imperfect tense

1. **Blass, Debrunner, and Funk — *A Greek Grammar of the New Testament and Other Early Christian Literature* (BDF)**
   - §133–134 (BDF)
   - Imperfect: expresses **ongoing or repeated past action**, often translated as "was doing" or "kept doing."
   - Aorist: expresses **simple, undefined past action**.
2. **Daniel B. Wallace — *Greek Grammar Beyond the Basics***
   - §16.1–16.3 (Aspect in the verb system)
   - Imperfect = **past imperfective aspect**; stresses continuity or repetition in the past.
   - Aorist = **past perfective aspect**; simple, punctiliar action.
3. **A. T. Robertson — *A Grammar of the Greek New Testament in the Light of Historical Research***
   - §847–849

- Imperfect: “expresses action in progress in past time,” with habitual, customary, or repeated nuances.
- Aorist: “expresses simple action in past time, without regard to duration.”

4. **Moulton and Milligan — *The Vocabulary of the Greek Testament*** (grammatical discussion)
    - Imperfect = continuous past, often for narrative background.
    - Aorist = simple narrative action.

	SIMPLE ASPECT	*PROGRESSIVE / REPEATED ASPECT*	*COMPLETED ASPECT*

Imperatives:

Imperatives	**Active**	**Middle**	**Passive**
Present Tense	keep going	keep going for yourself	let it be gone
Aorist Tense	go	go for yourself	be gone

Subjunctives:

Subjunctives	**Present linear action**	**Aorist point action**
normal	that 2443 he may be going	that 2443 he might go
Indicative	is going[sp]	goes[sp]
Infinitive	to be going[si]	to go[si]

Deliberate question: “shall/ will”	[o]
Hortatory, is translated "let us xxx"	[t]

Prohibitive	[u]
Double negative "ou mh" is translated as "will/shall"	[v]

We changed all subjunctives to present indicatives or infinitives, unless it makes more sense in English to keep “may, might or should”.

The choice between **"until the earth passes away"** and **"until the earth pass away"** depends on whether you are aiming for **contemporary English** or **archaic/literary** style.

1. Contemporary English:

☑ **"until the earth passes away"**

- "passes" is the present subjunctive form in modern English grammar.
- In standard modern English, we use the **third person singular -s** ending even in subordinate clauses introduced by "until."
- This would be the preferred rendering for clarity and grammatical correctness today, even if the Greek verb is in the **aorist subjunctive** (which doesn’t always require a distinct subjunctive form in English).

2. Archaic / Literary English (e.g., KJV-style):

☑ **"until the earth pass away"**

- "pass" here reflects the **archaic subjunctive**, which omits the -s ending in the third person singular.
- This is consistent with older translations like the King James Version (e.g., *"Till heaven and earth pass, one jot or one tittle shall in no wise pass from the law..."* — Matt 5:18, KJV).
- It can reflect the aorist subjunctive more literally if you're preserving a heightened or formal tone.

Optative:

Present tense:

may you drive!

Aorist tense:

The **optative of wish** or **volitive optative** expresses wishes for the future: "may it happen!" It is sometimes preceded by εἴθε (*eíthe*) or εἰ γάρ (*ei gár*) "if only":

> **γένοιο** πατρὸς εὐτυχέστερος.
> ***génoio*** *patròs eutukhésteros*. (*aorist optative*).
> **May you be** more fortunate than your father!

In all other situations: might you drive!

Participles:

Main Verb	Present Participles	Aorist Participles
Present	*am* going	went/ *has* gone
Imperfect	*was* going	*had* gone
Future	*will be* going	*is* going/ went
Aorist	*was* going	*had* gone (attendant circumstance: went)
Perfect	*was* going	*had* gone
Pluperfect	*was* going	*had* gone

Uses

Note: You translate in the same tense as the main verb with attendant circumstance

Attendant circumstance (*and* **is added)**: **Notice** both the participle and the main have to be aorist

the man fell down *and* worshiped Jesus

Explanation:

1. Communicates an action that is coordinate with the action of the finite verb.
2. The participial action must happen before the main verbal action and is closely related to it.
3. Participle is translated as a finite verb, connected to main verb with word '*and*'.

a. It derives its mood semantically from the main verb.

Structure: 90% of the time, all five of the following features are present:

1. Participle usually aorist tense.

2. Main verb usually aorist tense.

3. Main verb usually imperative or indicative mood.

4. Participle will precede main verb in word order and time of happening (though usually very close proximity).

5. Frequent in narrative literature, infrequent elsewhere.

Did you know that some words are **not** in italics and they are **not** found in the Greek text? **But they should**! It is because the translators have put a use to a participle or infinitive.

Other examples:

Having fallen down, the man worshiped Jesus

Falling down, the man worshiped Jesus

Time (*as* is added in present tense):

As the man was falling down, he worshipped Jesus

Note: when the main verb (here: worshipped) is in the past tense, the participle is translated: aorist or perfect—pluperfect … if the main have been present tense, then you translate in the same tense.

Having fallen down, the man worshiped Jesus

Time (*when* is added in aorist tense):

When the man had fallen down, he worshiped Jesus

Cause (*because* is added):

Because the man had fallen down, he worshiped Jesus

Condition (*if* is added):

If the man had fallen down, he worshiped Jesus

Concession (though is added):

Though the man had fallen down, he worshiped Jesus

Purpose:

Having fallen down, he worshiped Jesus

Manner:

By fallen down, he worshiped Jesus

Means:

With fallen down, he worshiped Jesus

Substantive:

The one *who* had fallen, worshiped Jesus.

Absolutes:

After the man had fallen, the rest worshiped Jesus.

Simple adjective:

The fallen man worshiped Jesus

Periphrastic:

The man was falling as he worshiped Jesus

1. A Greek Grammar of the New Testament and Other Early Christian Literature — Blass, Debrunner & Funk (BDF)

- **§339.1**:

"The aorist participle denotes action **prior** to that of the main verb."

- Example:

ταῦτα εἰπών ἐπορεύθη → *"after he had said this, he went away."*

Summary: BDF is one of the foundational grammars of NT Greek. It states unambiguously that the **aorist participle normally refers to action antecedent to the main verb**, unless context clearly suggests contemporaneous time (which is rare).

2. Greek Grammar Beyond the Basics — Daniel B. Wallace

- pp. 614–615:

"The aorist participle usually denotes **antecedent time** to the controlling verb, regardless of the tense of that verb."

- He gives the classic time correlation table, where for an **aorist main verb**, the aorist participle = **past perfect** in translation.

Summary: Wallace is widely used in NT exegesis. He explicitly connects **aorist participle** with **pluperfect translation value** in narrative contexts.

3. A Grammar of the Greek New Testament in the Light of Historical Research — A.T. Robertson

- p. 861ff:

"The aorist participle commonly expresses **antecedent action**, that is, action prior to the verb on which it depends. It is the normal tense for such relations in Greek."

- He also notes:

"This usage corresponds well to the **English past perfect** ('after he had said') and the **French plus-que-parfait**."

Summary: Robertson reinforces that **antecedence is the norm** with the aorist participle — simultaneity is exceptional.

4. Greek: An Intensive Course — Hansen & Quinn (Classical Greek)

- Unit 15 (Participles of Time):

"The **aorist participle** indicates an action **completed before** the action of the main verb."

Summary: Even outside NT Greek, Classical Greek grammar maintains the same temporal relationship.

5. A New Short Grammar of the Greek Testament — J.H. Moulton (rev. Turner)

- p. 140:

"The aorist participle regularly denotes **an action prior to** that of the leading verb. This is the normal idiom of the language."

6. Syntax of the Moods and Tenses in New Testament Greek — Ernest De Witt Burton

- §141:

"The aorist participle **regularly expresses antecedent action** with reference to the verb with which it is associated."

Please note:

- Greek **participles are extremely flexible**: they can convey **time, cause, manner, condition, concession, result, attendant circumstance, or simply describe a quality**.
- The same participle can be read **literally** or **functionally/causally**, depending on context.

For example, in **John 6:18**:

- **πνέων** ("blowing") can be interpreted as:
    1. **Attendant circumstance / simultaneous action** → *"the sea was agitated <u>and</u> a great wind <u>was blowing</u>"*
    2. **Adjectival modifier** → *"the sea was agitated by a great <u>blowing</u> wind"*
    3. **Causal** → *"the sea arose, because a great wind <u>was blowing</u>"* (like NKJV)
- All are **grammatically correct**, because the participle inherently carries aspect and function rather than being fixed in a single syntactic role.

So, as a translator, you **can let the Greek participle "choose" its role**, depending on whether you want **literal faithfulness** or **functional clarity** in the target language.

Exceptions

1492 οιδα oida in the perfect tense is translated non linear as know: he knows[b]

in the pluperfect tense, it is translated as the imperfect: <knew[b]

οἶδα (*I know*) is 2nd perfect in form but is used with a present meaning. ᾔδειν (*I <knew*) is 2nd pluperfect in form but is used with an imperfect meaning. The conjugations are as follows:

1st person	**οἶδα**	*I know*[b]	**οἴδαμεν**	*we know*[b]
2nd person	**οἶδας**	*you know*[b]	**οἴδατε**	*you (pl.) know*[b]

3rd person	**ᾔδει**	*he, she, it <knew*[b]	**ᾔδεισαν**	*they <knew*[b]

<2476> (5761) standing[b] (perfect participle as substantive and periphrastic)

<2476> (5715) was/were standing[b] (pluperfect indicative)

<3936> (5761) standing by[b] (perfect participle)

<4921> (5761) standing with[b] (perfect participle)

perfect tense in Greek often emphasizes the enduring state or result of a completed action. When such verbs are translated into English, especially in contexts like biblical or theological texts, they may naturally take on a **present passive indicative** sense. Here's a breakdown:

1. Perfect Tense in Greek: Abiding Results

The **perfect tense** in Greek denotes:

A **completed action** in the past.

A **continuing state or result** in the present because of that action.

This dual aspect (past action + present result) often overlaps with the English **present tense** when the focus is on the continuing result, rather than the action itself.

2. Examples: From Perfect Passive to Present Passive in Meaning

a) "It is written[b]"

Greek: **γέγραπται (gegraptai)**

Perfect Passive Indicative of γράφω ("to write").

Meaning: "It has been written" (completed action).

Present sense: "It is written" (emphasizing the enduring authority or existence of the writing).

b) "It is finished[b]

Greek: **τετέλεσται (tetelestai)**

Perfect Passive Indicative of τελέω (“to finish, complete”).

Meaning: “It has been finished” (completed action).

Present sense: “It is finished” (stressing the ongoing reality of the finished state).

3. Why Perfect Passive Often Becomes Present Passive in Translation

a) Focus on the State

The perfect tense highlights the **current state** resulting from the action, which aligns closely with the English present tense. For instance:

"It is written" means the writing *exists* in its completed form.

b) Timeless Truths

Biblical or theological texts often use perfect passive verbs to convey **timeless truths** or enduring realities. Translating them as present passive in English makes the statement feel active and applicable in the here and now.

c) Conciseness in English

English does not always use phrases like “has been” to indicate a past action with present results when a simpler “is” suffices.

4. Summary

In contexts like “It is written” or “It is finished[b]”:

The **perfect passive indicative** in Greek communicates a completed action with an ongoing result.

English translations use **present passive indicative** when emphasizing the result or current state.

This phenomenon also occurs when the context is in the **past** which translates like the historical present. Now it becomes **aorist passive indicative**: “was born“

Preposition

Notice that the prepositions are the bottom the list in the importance of the part of speech. Because of this, it is important to NOT create a doctrine based upon a preposition. Here is an example:

"For" (as used in Ac 2:38 "for the forgiveness … ") could have two meanings. If you saw a poster saying "Jesse James wanted for robbery," "for" could mean Jesse is wanted so he can commit a robbery, or is wanted because he has committed a robbery. The later sense is the correct one. So too in this passage, the word "for" signifies an action in the past. Otherwise, it violate the entire tenor of the NT teaching on salvation by grace and not by works.

Expository study

When using Greek, it is important to notice the arrangement of the Greek words. Normally when a word comes first in the sentence, it is for emphatic reasons.

It is always good to locate the “kernel” or main thought of the sentence. The main thought be the section where the verb can stand by itself. Example:

Because it was a long day, while the sunshine still glowed on the horizon, the woman cooked a meal for her family even though they were not grateful.

29 *and* yet <1161> {conj} I am saying <3004> (5719) {v-pai-1s} to[i] you <5213> {p-2dp-**PI**} <3754> {conj} "not *even* <3761> {conj-n} Solomon <4672> {n-nsm-**SU**} in <1722> {prep} all <3956> {a-dsf} his <846> {p-gsm-**PO**} <3588> {t-dsf} glory <1391> {n-dsf} arrayed himself <4016> (5639) {v-2ami-3s} like <5613> {adv} one <1520> {a-nui-**SU**} of[i] these <5130> {d-gpn-**W**}."

30 Now <1161> {conj} if <1487> {cond} <3588> {t-nsm} God <2316> {n-nsm-**SU**} is so <3779> {adv} clothing <294> (5719) {v-pai-3s} the <3588> {t-asm} grass <5528> {n-asm-**DO**} of[i] the <3588> {t-gsm} field <68> {n-gsm-**PL**}, *which* today <4594> {adv} is <1510> (5723) {v-pap-asm-**S**}, and <2532> {conj} tomorrow <839> {adv} *is* being thrown <906> (5746) {v-ppp-asm-**S**} into <1519> {prep} *the* oven <2823> {n-asm}, *will He* not[y] <3756> {prt-n} much <4183> {a-dsn} more <3123> {adv} *clothe* you <5209> {p-2ap-**DO**}, *O you of* little faith <3640> {a-vpm-**V**}?

31 Therefore <3767> {conj} do[u] not <3361> {prt-n} worry <3309> (5661) {v-aas-2p}, saying <3004> (5723) {v-pap-npm-**MA**}, 'What <5101> {i-asn-**DO**} shall[o] we eat <5315> (5632) {v-2aas-1p}?' or <2228> {prt} 'What <5101> {i-asn-**DO**} shall[o] we drink <4095> (5632) {v-2aas-1p}?' or <2228> {prt} 'What <5101> {i-asn-**DO**} shall[o] we wear <4016> (5643) {v-2ams-1p}?'

32 For <1063> {conj} after all <3956> {a-apn} these *things* <5023> {d-apn-**DO**} the <3588> {t-npn} Gentiles <1484> {n-npn-**SU**} are seeking <1934> (5719) {v-pai-3s}. For <1063> {conj} your

See **Joh 4:24**, where it is not "Spirit is God," but "God is Spirit," because here "God" has the article. See also **Mt 22:32**. Secondly, a noun following the verb "to be" without the article indicates the essence or nature of the word. Finally, in Greek, the predicate most commonly precedes the verb "to be."
